

The Spirit of Alliances: Support and Wellness Framework

RAVEN—Courage/Learning and Academic Support

The Raven's gift to the learning process is **cleverness and imagination**. The Raven **weaves together old, new, and emerging knowledge to create a basket of skills, opportunities and potentials**. When the Raven's gifts are accessible to students and they are able to integrate them into their learning experiences, they have more opportunity to develop their inherent talents and capabilities. **A key principle of the Raven's gift to the learning process is recognizing that storytelling, art, memory, and culture are woven throughout learning.**
